EDUCATION

Graduated
University of Management and Technology
CGPA: 2.92

PERSONAL PROJECTS

AR Wardrobe (Final Year Project)
(09/2022 - 07/2023)
- Working with my project members to develop an Augmented Reality Wardrobe application so the hectic process of performing the tasks has been converted from manual to automatic.
- Flutter, Vuforia ,Unity, Firebase.

Personal Portfolio Website
- I developed a responsive website to showcase my skills, experience and achievements in my field of expertise.
- It demonstrates my experience working with various tools and technologies, bootstrap, HTML and CSS.

Face Recognition Application
- This program compares a human face to an image of a digital photograph that is kept in a database.
- Python

BMI Calculator
- I developed an application that analyzes your BMI according to your height and weight.
- Attractive UI.
- Java, Firebase

To-Do Application
- Allows users to create and arrange a list of tasks, set reminders and due dates, rank tasks and monitor progress. Users benefit from better productivity, time management and organization.
- Java, Firebase.
